NewGenLib Library Management System (LMS) with RFID Technology of Library Automation is implemented in the Central library of the institution.

The details of the LMS are as follows:
NewGenLib Ver.3.0.4
Integrated Library Management System (with RFID Technology)
Subscription ID: "NGL171"

Library Management System (LMS) allows for the tracking of books, journals, magazines, and other materials available, orders placed, bills paid, patrons (Staff and Students) who have borrowed the books from the library, and document searches on a variety of categories of books such as authors, titles, year of publications, publishers, and many. Library Management System (LMS) consists of a relational database, software to interact with the database.

The LMS segregates software functions into distinct programs known as modules such as the Technical processing module - which consists of primary, search, import of cataloguing.

Circulation module- contains check out (issues), check-in (return), reservations, renewal or loan, binding management, overdue management, RFID, report of lost items, a record of reference materials, and request for check out, each of them is integrated with a unified interface.

Acquisitions module – consists of search, process requests, process approval of supplies, firm orders, receive orders, gifts, accession received, process payment (invoice received), invoice payment details, claims for unsupplied items, process quotations.

Serial management – consists of processing new subscriptions, ordering subscriptions, receiving invoices, registering serial issues. Online Public Access Catalogue /Public User Interface (OPAC) - consists of reviewing user ratings, approving user comments, user catalogue records, opening OPAC, new arrivals.

Reports- can take library usages statistics reports.

Digital Gate Log IN –Out system implemented.

NewGenLib Ver.3.0.4- The software functional modules are completely web-based. Uses Java Web StartTM Technology. Compatibility – Complies with international metadata and interoperability standards: MARC-21, MARC-XML, z39.50, SRU/W, OAI-PMH. It uses open-source components, scalable,
manageable, and efficient. It is OS independent – Windows and Linux flavours available, Z39.50 Client for federated searching, Internationalized application (11 8N), Unicode 4.0 complaint, easily extensible to support other languages, Data entry, storage, retrieval in any (Unicode 3.0) language, RFID integration: Book Tags, Gate Antennas, Work Station, Handheld Reader, Self-KIOSK.
