Educational institutions participate in the process of producing high-quality outcomes rather than merely providing escort. The best part of the recruitment process is the process of weeding out the appropriate individuals. It is difficult to develop such a source in the current market. A catalyst is required to examine the set of obstacles. The ideal spindle of spark is needed to light the business demands' fumes. As more talents than scores are required by the system, the number of marginal candidates is rising daily. Perhaps equally important is the intangible node of qualitative absorption. Raja Rajeswari College of Engineering's students received instruction on three distinct kinds of modules:

- Quantitative Aptitude
- Verbal Reasoning
- Logical Reasoning

The overall services we provide:

- Foundation from Campus to corporate.
- IT services including web design and templates.
- Virtual HR house.
- IT/BT Core technical/non-technical corporate training.

We are certain that every training programme we provide is of the highest calibre, and we never stop working to get better.

We think that effective training should be carefully thought out, well prepared, appropriate for the audience, and presented by motivating and inspirational trainers who can make it engaging and enjoyable. These trainers can and will have a positive impact on your workforce and your business.

QUANTITATIVE REASONING

In order to analyse and understand real-world quantitative data in the context of a subject or an interdisciplinary topic and come to conclusions that are applicable to students in their everyday lives, quantitative reasoning (QR) is the application of fundamental mathematical skills. In order to evaluate data, make conclusions, and solve issues, students in QR must exercise critical thinking as well as fundamental mathematical and statistical knowledge. In undergraduate education, the capacity for clear quantitative thought is of utmost importance.

QuanTech to lash with its mission abides to render its deepest dynamism in associating with the educational institutes. The key role played by any institute is the added bonus to the world in its excellence. Keeping the actuality in mind and to act upon the requirement of the industry, QuanTech emerges to outlay its cons by building a rugged relationship with the educational institutes.

We never eliminate the fact that what does an end user want. The treasure of pursuit of a profession typically lies in the hands of a gate keeper than an actual employee. A recruiter finds a match at least up to 75% of the requirement. The system is somewhere summing up the quality to the corporate itself to fetch the handful of focused aspirants.

TIME BREAK THOUGH

The eight days training workshop was conducted on consecutive node, from 4,5,6,7,11,12,13,14th July 2022. Each day the session started at 9:30 am and ended on 03:30 pm. Each day there was one fifteen minutes coffee break at 10:45 and there was a forty five minutes lunch break at 12:45 pm.

PROGRESS ACHIEVED

The RajaRajeswari College of Engineering students are capable of determining the data requirements for an appropriate programme.

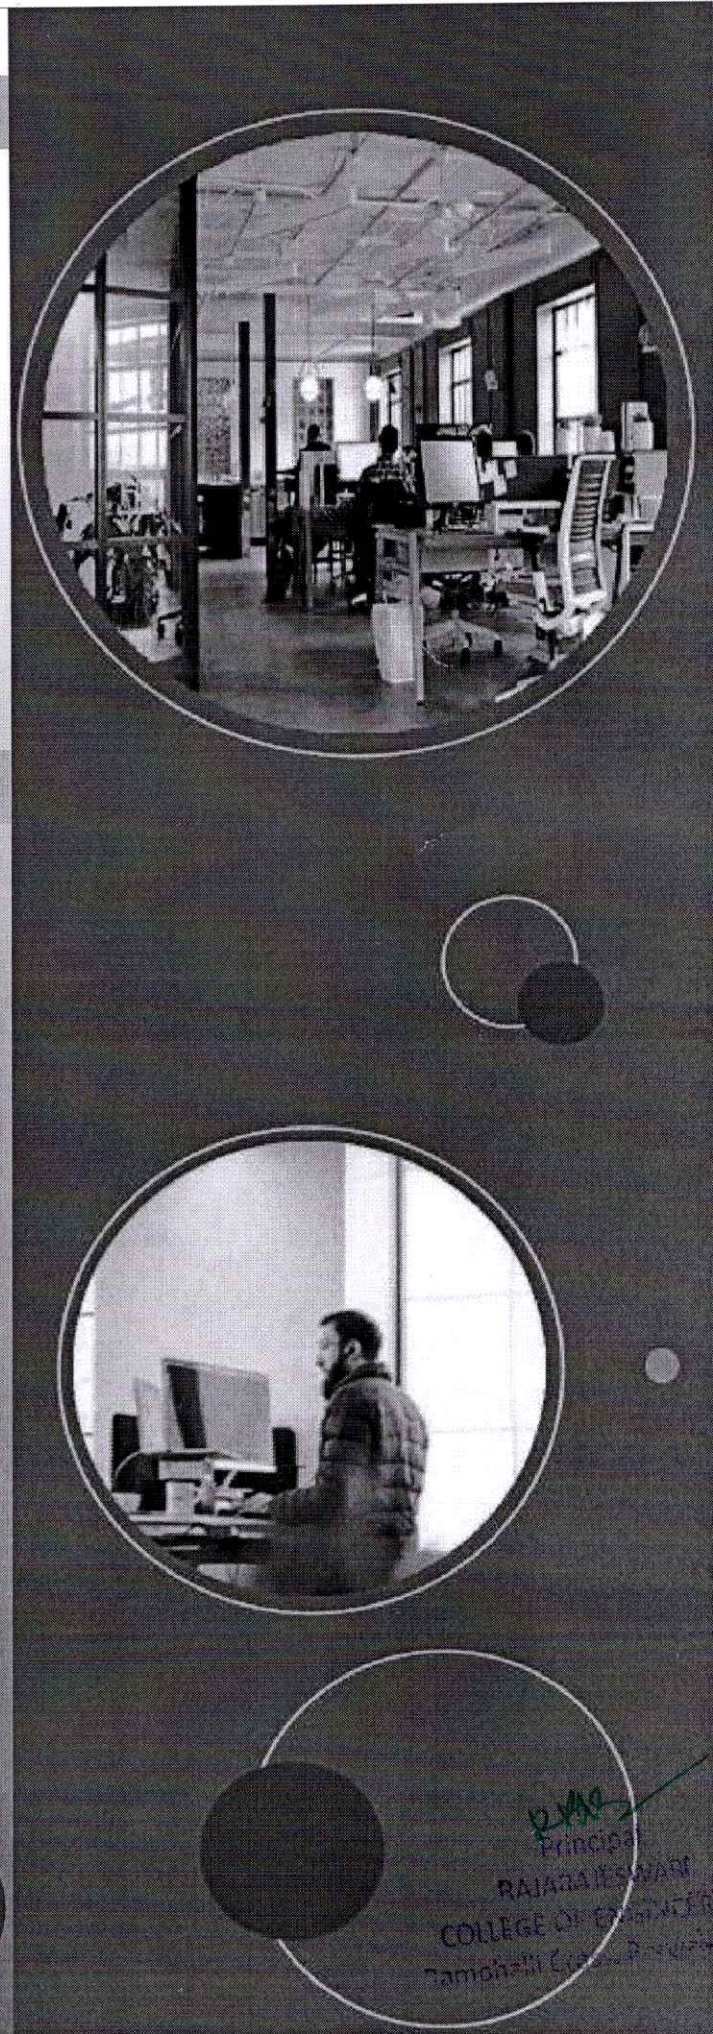

They learned how to gather information for analysis in order to comprehend what was happening.

They are turned to be capable of creative thinkers to solve problems.

The students are now familiar with how to perform a root cause analysis and get this right before jumping to conclusions too quickly.

The students logical reasoning skills have improved, and they are more assured when tackling logic-related difficulties.

The students show more activeness and are more aware of the necessity regarding the program and its implication.

We genuinely show our accomplishment-related pride in our work. Where we excel despite our challenges is in the kind to improve the exhibition in giving the grade nature of preparation.

The facilitator employed a variety of facilitation strategies, including question-and-answer sessions, brain learners' practical application of some of the themes under discussion and storming. Because merely listening to the trainers can be forgotten, but what the trainees do on their own, they will never forget, a variety of training approaches were used to ensure that all trainees understood all ideas and practised what they learned.

TRAINER'S RATING BY STUDENTS OF RRCE

The training program was a successful slot of 6 days and all the trainees took active participation in the program. QuanTech Origin took feedback form from the students regarding the trainers' performance in the class regularly.

After reviewing the feedback forms it implies that around 80% of the students who took part in the training program found it very useful and rated EXCELLENT, 15% of the students found the training program to be GOOD and the remaining 5% found it to be AVERAGE. Trainers' ratings by the students is as mentioned below.

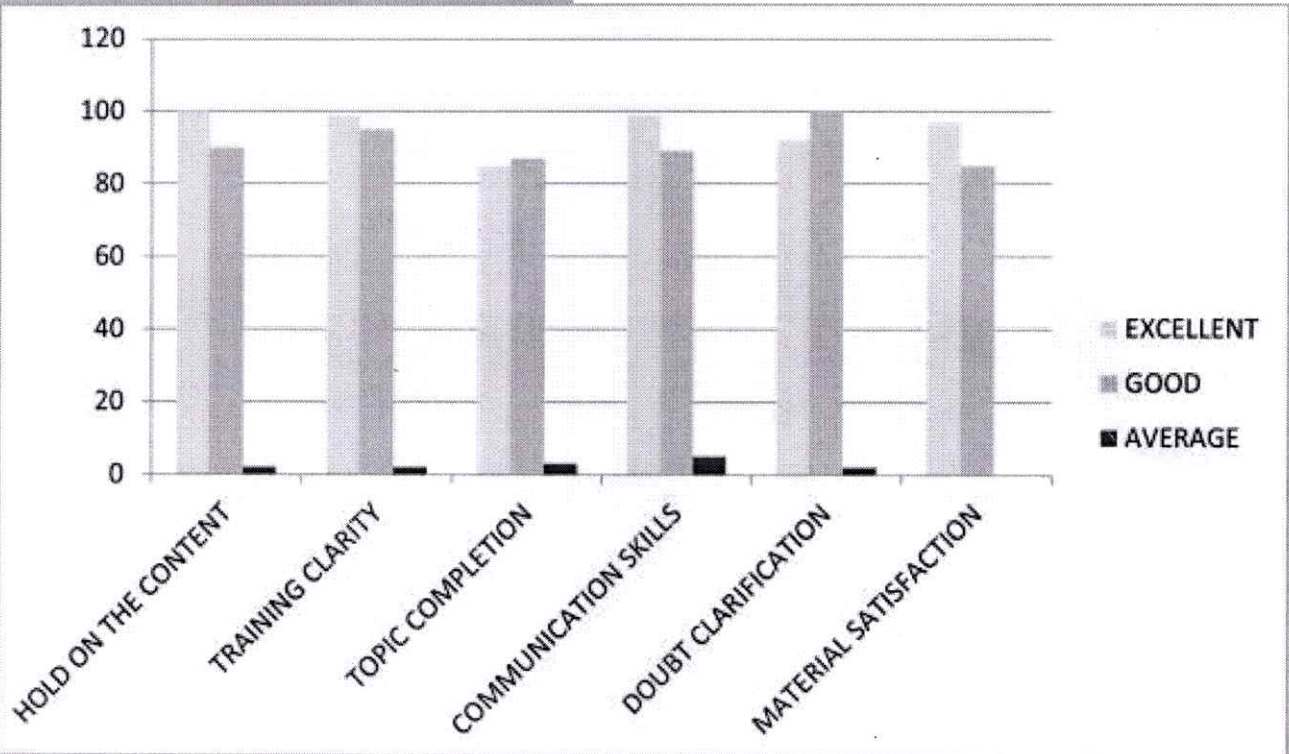

To your noticeable surprise QuanTech Origin accord you with the rightful answers. The challenges of generating quality is act of "clap", when Institutes can rope a right firm to make their efforts more convincible to generate qualitative candidates for the corporate system, it's not very far from displacing the unsatisfactory from "Satisfactory" skilled sources for the industry. QuanTech a marshal of high essence of Human resource marched towards a common goal.

The modules were distributed among the potential trainers. They engaged the sessions with tremendous explanation, problem solving and most relevant examples. There was three levels of questions, level 1, level 2 and level 3 and we assisted the students with all the hacks they needed to know during solution process. At the end of each Session, there was a daily feedback form provided by QuanTech Origin which covered every concern of students with respect to the training program.

Trainers Feedback

As per the feedback is concerned, QuanTech origin is very much dedicated to serve the purpose that no student is left behind for his/her interests not being fulfilled. Feedback is the best way to reach out any student, trainer or any organization to reach out the limits of improving and excelling tomorrow.

Feedback is a strategy we believe in. Our demand for right and genuine feedback is as important as our content delivery. We also believe that things get better when we understand the pros and cons of every person from a student to a trainer.

FACILITATION

We genuinely demonstrate the pride of accomplishment of our work. The caliber to enhance the performance in rendering the grade quality of training is where we outstand from our challenges.

There were several facilitation techniques used by the trainer which included question and answer, brain storming and practical implementation of some of the topics by trainees.

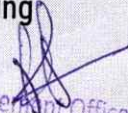

The multitude of training methodologies was utilized in order to make sure all trainees get the whole concepts and they practice what they learn, because only listening to the trainers can be forgotten, but what the trainees do by themselves they will never forget.

PROTOCOL

To your noticeable surprise QuanTech Origin accord you with the rightful answers. The challenges of generating quality is act of "clap", when Institutes can rope a right firm to make their efforts more convincible to generate corporate displacing the unsatisfactory qualitative candidates for the system, it's not very far from from "Satisfactory" skilled sources for the industry. QuanTech a marshal of high essence of Human resource marched towards a common goal.

The modules were distributed among the potential trainers. They engaged the sessions with tremendous explanation, problem solving and most relevant examples. There was three levels of questions, level 1, level 2 and level 3 and we assisted the students with all the hacks they needed to know during solution process. At the end of each Session, there was a daily feedback form provided by QuanTech Origin which covered every concern of students with respect to the training program.

TRAINER'S FEEDBACK

As per the feedback is concerned, QuanTech origin is very much dedicated to serve the purpose that no student is left behind for his/her interests not being fulfilled. Feedback is the best way to reach out any student, trainer or any organization to reach out the limits of improving and excelling tomorrow.

Feedback is a strategy we believe in. Our demand for right and genuine feedback is as important as our content delivery. We also believe that things get better when we understand the pros and cons of every person from a student to a trainer.

Summary of feedbacks from our trainers is as below:

The performance of all the batches was commendable, with the students displaying a high level of responsiveness. The interactive nature of the sessions proved to be a significant asset, as students actively engaged by posing numerous questions.

Notably, certain students who initially exhibited hesitancy in verbal participation displayed remarkable progress by becoming enthusiastic speakers and eager participants during interactions.

Students demonstrated the ability to articulate their perspectives effectively through meaningful interactions.

However, there remains room for improvement, particularly in encouraging students to express themselves more confidently and reducing any hesitancy they may feel. Grooming in terms of communication skills is also advised.

The training sessions garnered positive responses from all batches, with students showing increased engagement and willingness to participate in discussions. While notable progress has been achieved, further encouragement to enhance communication skills and self-expression is recommended.

FACILITATION

We genuinely demonstrate the pride of accomplishment of our work. The caliber to enhance the performance in rendering the grade quality of training is where we outstand from our challenges.

There were several facilitation techniques used by the trainer which included question and answer, brain storming and practical implementation of some of the topics by trainees.

The multitude of training methodologies was utilized in order to make sure all trainees get the whole concepts and they practice what they learn, because only listening to the trainers can be forgotten, but what the trainees do by themselves they will never forget.

PROTOCOL

To your noticeable surprise QuanTech Origin accord you with the rightful answers. The challenges of generating quality is act of "clap", when Institutes can rope a right firm to make their efforts more convincible to generate corporate displacing the unsatisfactory qualitative candidates for the system, it's not very far from from "Satisfactory" skilled sources for the industry. QuanTech a marshal of high essence of Human resource marched towards a common goal.

The modules were distributed among the potential trainers. They engaged the sessions with tremendous explanation, problem solving and most relevant examples. There was three levels of questions, level 1, level 2 and level 3 and we assisted the students with all the hacks they needed to know during solution process. At the end of each Session, there was a daily feedback form provided by QuanTech Origin which covered every concern of students with respect to the training program.

TRAINER'S FEEDBACK

As per the feedback is concerned, QuanTech origin is very much dedicated to serve the purpose that no student is left behind for his/her interests not being fulfilled. Feedback is the best way to reach out any student, trainer or any organization to reach out the limits of improving and excelling tomorrow.

Feedback is a strategy we believe in. Our demand for right and genuine feedback is as important as our content delivery. We also believe that things get better when we understand the pros and cons of every person from a student to a trainer.

Summary of feedbacks from our trainers is as below:

The performance of all the batches was commendable, with the students displaying a high level of responsiveness. The interactive nature of the sessions proved to be a significant asset, as students actively engaged by posing numerous questions.

Notably, certain students who initially exhibited hesitancy in verbal participation displayed remarkable progress by becoming enthusiastic speakers and eager participants during interactions.

Students demonstrated the ability to articulate their perspectives effectively through meaningful interactions.

However, there remains room for improvement, particularly in encouraging students to express themselves more confidently and reducing any hesitancy they may feel. Grooming in terms of communication skills is also advised.

The training sessions garnered positive responses from all batches, with students showing increased engagement and willingness to participate in discussions. While notable progress has been achieved, further encouragement to enhance communication skills and self-expression is recommended.

The overall services we provide:

- Foundation from Campus to corporate.
- IT services including web design and templates.
- Virtual HR house.
- IT/BT Core technical/non technical corporate training.

We are confident that all of the training we deliver is at a gold standard and are constantly striving to improve and become even better.

We believe that training should be well planned, well prepared, fit for purpose and delivered by trainers who are motivational and inspirational, trainers who can make it interesting and fun, trainers who can and will make a difference to your people and your organization.

Educational institutes don't just give escort but involve in the process of generating the quality outputs. The process of skimming the right candidates is the finest end of the recruitment. To build such a source is a challenge in current market.

The set of hurdle needs to be surveyed by a catalyst. To ignite the fumes of corporate demands requires the perfect spindle of spark. The sum of marginal candidates is increasing day by day as the system demands for more skills than scores.

Perhaps the intangible node of qualitative absorption is also crucial.

The students of Rajarajeswari College of Engineering were trained on different topics across the following modules:

- Quantitative Aptitude

FACILITATION

We genuinely demonstrate the pride of accomplishment of our work. The caliber to enhance the performance in rendering the grade quality of training is where we outstand from our challenges.

There were several facilitation techniques used by the trainer which included question and answer, brain storming and practical implementation of some of the topics by trainees.

The multitude of training methodologies was utilized in order to make sure all trainees get the whole concepts and they practice what they learn, because only listening to the trainers can be forgotten, but what the trainees do by themselves they will never forget.

PROTOCOL

To your noticeable surprise QuanTech Origin accord you with the rightful answers. The challenges of generating quality is act of "clap", when Institutes can rope a right firm to make their efforts more convincible to generate corporate displacing the unsatisfactory qualitative candidates for the system, it's not very far from from "Satisfactory" skilled sources for the industry. QuanTech a marshal of high essence of Human resource marched towards a common goal.

The modules were distributed among the potential trainers. They engaged the sessions with tremendous explanation, problem solving and most relevant examples. There was three levels of questions, level 1, level 2 and level 3 and we assisted the students with all the hacks they needed to know during solution process. At the end of each Session, there was a daily feedback form provided by QuanTech Origin which covered every concern of students with respect to the training program.

TRAINER'S FEEDBACK

As per the feedback is concerned, QuanTech origin is very much dedicated to serve the purpose that no student is left behind for his/her interests not being fulfilled. Feedback is the best way to reach out any student, trainer or any organization to reach out the limits of improving and excelling tomorrow.

Feedback is a strategy we believe in. Our demand for right and genuine feedback is as important as our content delivery. We also believe that things get better when we understand the pros and cons of every person from a student to a trainer.

Summary of feedbacks from our trainers is as below:

All batches performed admirably, and students demonstrated a high level of responsiveness. The interactive nature of the sessions was a significant advantage, with students actively participating by asking numerous questions.

It's worth noting that some students who initially hesitated to participate verbally made remarkable progress. They evolved into enthusiastic speakers and eager participants during interactive sessions.

Students effectively expressed their perspectives through meaningful interactions. There is still room for improvement, especially in boosting students' confidence and reducing hesitancy in self-expression. Additionally, grooming in terms of communication skills is recommended.

The training sessions received positive responses from all batches, as students increasingly engaged and demonstrated a willingness to participate in discussions. While significant progress has been made, further encouragement to enhance communication skills and self-expression is advised.
