### Report of Industrial Visit

Report of industrial visit to **Bharath Arts and Crafts**, Channapatna, Ramnagara (Dt) on Saturday, **10th February 2024** with respect to the subject **SOCIAL CONNECT & RESPONSIBILITIES** of 3rd-semester students (166 students, A, B&C) of CSE.

The following 6 faculty members arranged, coordinated, and accompanied the students during the industrial visit to **Bharath Arts and Crafts**, Channapatna.

**Mrs.Priyanka V.Gudada, AP-CSE**

**Mrs.Sriraksha, AP-CSE**

**Mrs.Josna, AP-CSE**

**Mrs.Suhasini Bagalkot, AP-CSE**

**Mrs.Deepa konnur, AP-CSE**

**Mr.Sunil Mehta, AP-CSE**

Students of the Department of Computer science &Engineering are ready to board the bus to M/s Bharath Arts and Crafts, Channapatna, Ramnagara (Dt)

### Information collected during the visit at

#### M/s Bharath Arts and Crafts, Channapatna, Ramnagara (Dt) by students

- As we all know channapatana is famous for manufacturing toys that are made up of wood.
- We first visited the toys store in channapatana and learn about the various handmade manufacturing procedures for making wooden toys and purchased a few toys.
- All toys were very catchy and felt like buying everything in the store.
- When we discussed with the working staff there in the toy store, they gave the information about the various types of wood and the making procedure of wooden toys.
- All the toys were made in different kinds of woods like neem, aleemara and rosewood and many more.
- Another wood, they import it from 50 km away from channapattana which is a very unique tree.
- The toys or products manufactured were not only playing kits for children but also key chains, home décor items, kitchen set items, bangles, showcase dolls, and also education-related toys or playing boards were also there.
- The colors that they apply to the toys are natural colors from turmeric and many more.
- Then, we visited channapattana arts and handicrafts industry.
- In industry, they bring the raw materials different types of wood and start to manufacture different types of shapes for desired products.
  - There the machine used to give finishing to the product or surface finishing was by using salt paper and keeping the workpiece to be smoothed in the belt driven mechanism.
  - The belt keeps rotating at a speed (rpm) where the workpiece is kept to rotate, the worker starts to give surface finishing to the object by rubbing it to its surface using salt paper.
  - And giving color to the object is of the same procedure, for that process they use natural colors like an ancient leaf called taalegari which gives green color.
  - And finally giving it a finishing touch the process completes and the product is ready to sell.
- There we saw a CNC machine giving a design for a butterfly product.
- There we asked the operator how this works.
  - The person explained that the remote showing x-axis is the axial line moving in x or horizontal direction, y in vertical direction and z-axis is for how much depth it goes inside the wood.
  - They use the software called Corel Draw and design the product and copy it to a pen drive and plug it to the remote and then the operation is carried out.
